

NEW YORK STATE  
OFFICE OF CHILDREN AND FAMILY SERVICES  
**HEALTH CARE PLAN**  
Day Care Center

|                 |   |   |
|-----------------|---|---|
| PROGRAM NAME:   | Doodle Bugs! Children's Centers: East Amherst |   |
| LICENSE NUMBER: | 44894   | DATE HEALTH CARE PLAN SUBMITTED TO THE OFFICE OF CHILDREN AND FAMILY SERVICES (OCFS): / / |

**Note:**

- It is the program's responsibility to follow the health care plan and all day care regulations.
- OCFS must review and approve the health care plan as part of the licensing/registration process.
- OCFS must review and approve any changes or revisions to the health care plan before the program can implement the changes.
- A health care consultant must approve health care plans for programs that administer medications and for programs that care for infants and toddlers or moderately ill children.
- The program's health care plan will be given to parents at admission and whenever changes are made, and the health care plan will be made available to parents upon request.
- The health care plan must be on site and followed by all staff/caregivers.
- The program's anaphylaxis policy will be reviewed annually, and parents will be notified of the policy at admission and annually after that.
- If a conflict occurs between day care regulations and emergency health guidance promulgated by DOH in the interest of public health during a designated public health emergency, such emergency guidance must be followed.

Table of Contents

## Section 1: Child Health and Immunizations

The program cares for (check all that apply; at least one MUST be selected):

- Well children**
- Mildly ill children** who can participate in the routine program activities with minor accommodations. A child who meets any of the following criteria is defined as "mildly ill":
  - The child has symptoms of a minor childhood illness that does not represent a significant risk of serious infection to other children.
  - The child does not feel well enough to participate comfortably in the usual activities of the program but is able to participate with minor modifications, such as more rest time.
  - The care of the child does not interfere with the care or supervision of the other children.
- Moderately ill children** who require the services of a health care professional but have been approved for inclusion by a health care provider to participate in the program. A child who meets any of the following criteria is defined as "moderately ill":
  - The child's health status requires a level of care and attention that cannot be accommodated in a child day care setting without the specialized services of a health professional.
  - The care of the child interferes with the care of the other children and the child must be removed from the normal routine of the child care program and put in a separate designated area in the program, but has been evaluated and approved for inclusion by a health care provider to participate in the program.

**NOTE:** The definitions above do not include children who are protected under the Americans with Disabilities Act (ADA). Programs must consider each child's case individually and comply with the requirements of the ADA. For children with special health care needs, see Section 2.

### **Key criteria for exclusion of children who are ill**

- The child is too ill to participate in program activities. ▲
- The illness results in a need for care that is greater than the staff can provide without compromising the health and safety of other children; ▲
- An acute change in behavior – this could include lethargy/lack of responsiveness, irritability, persistent crying, difficult breathing or having a quickly spreading rash; ▲
- Fever:
  - Temperature above 101°F [38.3°C] orally, or 100°F [37.8°C] or higher taken axillary (armpit) or measured by an equivalent method **AND** accompanied by behavior change or other signs and symptoms (e.g., sore throat, rash, vomiting, diarrhea, breathing difficulty or cough). ▲
  - Under six-months of age: Unexplained temperature above 100°F [37.8°C] axillary (armpit) or 101°F [38.3°C] rectally (caregivers are prohibited from taking a child's temperature rectally) should be medically evaluated. ▲
  - Under two months of age: Any fever should get urgent medical attention. ▲

Adapted from Caring for Our Children: National Health and Safety Performance Standards; Guidelines for Early Care and Education Programs, 3rd Edition.

- Diarrhoea:

  - o Diapered children whose stool is not contained in the diaper or if the stool frequency exceeds two or more stools above normal for the child. A
  - o Toilet-trained children if the diarrhoea is causing soiled pants or clothing. A
  - o Blood or mucus in the stools not explained by dietary change, medication, or hard stools. A
  - o Confirmed medical diagnosis of salmonella, E. coli or shigella infection, until cleared by the child's health care provider to return to the program. A
  - o Vomiting more than two times in the previous 24 hours unless the vomiting is determined to be caused by a non-infectious condition and the child remains adequately hydrated. A
  - o Abdominal pain that continues for more than two hours or intermittent pain associated with fever or other signs or symptoms of illness. A
  - o Mouth sores with drooling unless the child's health care provider states that the child is not infectious. A
  - o Active tuberculosis, until the child's primary care provider or local health department states child is on appropriate treatment and can return. A
  - o Streptococcal pharyngitis (strep throat or other streptococcal infection), until 24 hours after treatment has started. A
  - o Head lice, until after the first treatment (note: exclusion is not necessary before the end of the program day). A
  - o Scabies, until treatment has been given. A
  - o Chickenpox (varicella), until all lesions have dried or crusted (usually six days after onset of rash). A
  - o Rubella, until six days after rash appears. A
  - o Petussis, until five days of appropriate antibiotic treatment. A
  - o Measles, until four days after onset of rash. A
  - o Mumps, until five days after onset of parotid gland swelling. A
  - o Hepatitis A virus infection, until the child is approved by the health care provider to return to the program. A
  - o Any child determined by local health department to be contributing to the transmission of illness during an outbreak. A
  - o Impetigo until treatment has been started. A

(exclusion criteria continued from previous page)

## Medical Statements and Immunizations

Upon enrollment, any child, except those in kindergarten or a higher grade, in the program will provide a written statement signed by a health care provider verifying that the child is able to participate in child day care and currently appears to be free from contagious or communicable diseases. A *Child in Care Medical Statement* for each child must have been completed within the 12 months preceding the date of enrollment. Form OCFS-LDSS-4433, *Child in Care Medical Statement* may be used to meet this requirement.

The program will accept a child who has not received all required immunizations only as allowed by regulation. The program will keep documentation that each child has received the immunizations required by New York State Public Health Law unless exempt by regulation.

How often are immunization records reviewed for each age group? (**check all that apply; at least one MUST be selected**)

- ◆ 6 weeks to 2 years:  Weekly  Monthly  Quarterly  Yearly
- ◆ 2 years to 5 years:  Weekly  Monthly  Quarterly  Yearly

Parents will be notified in the following way(s) when records indicate immunizations need to be updated: (**check all that apply**)

- Written notice
- Verbally

will accept plans given by children  
healthcare provider with all required

AM

Explain here: Additional documentation or instruction may be provided.

Other: (please attach the program's plan for individualized care)

Form OCS-6029, Individual Allergy and Anaphylaxis Emergency Plan

The program may use (check all that apply; at least one MUST be selected):

Explain here:

Additional documentation or instruction may be provided.

Other: (please attach the program's plan for individualized care)

Form OCS-LDS-7006, Individual Health Care Plan for a Child with Special Health Care Needs

The program may use (check all that apply; at least one MUST be selected):

- Any child with a known allergy will have a written individual Allergy and Anaphylaxis Emergency Plan attached to the individual Health Care Plan that includes clear instructions of action when an allergic reaction occurs. Additionally, upon enrollment into the child care program, the parent/guardian will complete form OCS-LDS-0792, Day Care Enrollment (Blue Card) or an equivalent that will include information regarding the child(s) known or suspected allergies. This documentation will be reviewed and updated at least annually or more frequently as needed. The program may be reviewed and updated at least annually or more frequently as needed. This documentation is to obtain approval to administer medication if the child needs medical treatment during program hours.

- Any child identified as a child with special health care needs will have a written individual Health Care Plan that will provide all information needed to safely care for the child. This plan will be developed with the child's parent and health care provider.

- Children with special health care needs means children who have chronic physical, developmental, behavioral, or emotional conditions expected to last 12 months or more and who require health and related services of a type or amount beyond that required by children generally.

## Section 2: Children with Special Health Care Needs

### **Section 3: Daily Health Checks**

A daily health check will be done on each child when the child arrives at the program and whenever a change in the child's behavior and/or appearance is noted. The child must be awake when the check is done, and the following procedure will be used (**check one; at least one MUST be selected**):

- See Appendix A: *Instructions for Daily Health Check*  
 Other:

Explain here:

The daily health check will be documented. Check the form you will use to meet this requirement:

- Form OCFS-LDSS-4443, *Child Care Attendance Sheet*  
 Other: (*please attach form developed by the program*) Online softwear application.

Staff will be familiar with the signs and symptoms of illness, communicable disease, and injury, as well as the exclusion criteria listed in the Health Care Plan in Section 1.

Staff and volunteers will be trained in preventing, recognizing, and responding to allergic reactions and anaphylaxis.

Staff will keep a current knowledge of the *New York State Department of Health's list of communicable diseases [DOH-389]* accessible at: [https://health.ny.gov/forms/instructions/doh-389\\_instructions.pdf](https://health.ny.gov/forms/instructions/doh-389_instructions.pdf)

Children will be monitored throughout the day. Parents will be notified immediately of any change in the child's condition or if the care of the child exceeds what the program can safely provide. If necessary, the program will make arrangements with the parents for obtaining medical treatment. If a parent cannot be reached or if the child's condition warrants, emergency medical treatment will be obtained without delay by calling 911.

Any signs of illness including allergic reactions and anaphylaxis, communicable disease, injury and/or suspected abuse and maltreatment found will be documented and kept on file for each child in the following way (**check all that apply; at least one MUST be selected**):

- In each child's file  
 In a separate log  
 Other:

Explain here:

|                              |                      |  |                      |

| LICENSEE INITIALS: | AM | DATE: | 1/27/25 | HEALTH CARE CONSULTANT (HCC) INITIALS (if applicable): | R3 |
|--------------------|----|-------|---------|--|----|

- Explain here:  
The program will ensure that adequate staff are available to meet the needs of the ill child without compromising the care of the other children in the program.
- Explain here: If symptoms were felt to be contagious to others, the parents will be separated from the child. While awaiting office to be supervised, the child will be kept comfortable.
- Explain here: Notified to pick-up child. While awaiting pickup, the child will be separated from others + moved to another room. While awaiting office to be supervised or monitored, the child will be kept comfortable.
- 1) Immediately make or cause to be made an oral report to the mandated reporter hotline (1-800-635-1522).
- 2) File a written report using form **LDS-2221A, Report of Suspected Child Abuse or Maltreatment** to the local Child Protection Services (CPS) within 48 hours of making an oral report.
- 3) After making the initial report, the reporting staff person must immediately notify the director or licensee of the center that the report was made.
- 4) The program must immediately notify OCS upon learning of a serious incident, involving a child which occurred while the child was in care at the program or was being transported by the program.
- 5) Additional procedures (if any):
- Explain here:

## **Section 4: Staff Health Policies**

The program will operate in compliance with all medical statement requirements as listed in 418-1.11(b).

Any staff person or volunteer with signs and symptoms of illness that match the exclusion criteria for children listed in this health care plan will not care for children.

## **Section 5: Infection Control Procedures**

The program will use the procedures in the attached appendices to reduce the risk of infection or attach an alternate for each area (check all that apply; at least one MUST be selected for each category):

- Hand washing       Appendix B       Other (attach)
- Diapering       Appendix C       Other (attach)
- Safety precautions related to blood and bodily fluids       Appendix D       Other (attach)
- Cleaning, disinfecting, and sanitizing of equipment and toys       Appendix E       Other (attach)
- Gloving       Appendix F       Other (attach)

- Cold pack
- Roller gauze
- Bandage tape
- Sterile gauze pads of various sizes
- Disposable gloves, preferably vinyl

The following are recommended items that a first aid kit should contain, but is not limited to:

Explain here: *Front desk kit in each classroom emergency bag.*

(It is recommended that a kit be taken on all trips off the program site and that a kit be kept in the emergency bag for use in the event of an emergency evacuation.)

The program's first aid kit(s) will be stored in the following area(s) in the program:  
at least one first aid kit.

First aid kits will be kept out of reach of children and restocked when items are used. The program will have

#### Section 7: First Aid Kit

Explain here:

Additional emergency procedures (if needed):

Other: (Attach)

Medical Emergency (Appendix G)

In the event of a medical emergency, the program will follow (check one; at least one MUST be selected):

Explain here: Classroom Binder.

Other:

On file

The emergency bag

The program will keep current emergency contact information for each child in the following easily accessible location(s): (check all that apply; at least one MUST be selected):

Other: (please attach form developed by the program)

OCS form: Day Care Enrollment, OCS-LDSS-0792 (Blue Card)

The program may use the following form to record emergency contact information for each child (check one; at least one MUST be selected):

911 and the poison control telephone numbers must be conspicuously posted on or next to the program's telephone.

The director and all teachers must have knowledge of and access to children's medical records and all emergency information.

If a child experiences a medical emergency, the program will obtain emergency medical treatment without delay by calling 911.

#### Section 6: Emergency Procedures

List any additional items (or substitutions for the recommended items listed above) that will be stored in the first aid kit: *various band-aids, tweezers, scissors, thermometer, flashlight, Hydrogen Peroxide, eye pad, eye rinse, alcohol wipes*  
 Staff will check the first aid kit contents and replace any expired, worn, or damaged items:  
**(check all that apply)**

- After each use
- Monthly
- Other:

Explain here:

The program will **(check all that apply)**:

- Keep the following non-child-specific, over-the-counter topical ointments, lotions, creams, and sprays in the first aid kit: *(Programs must have parental permission to apply before using.)*

Explain here: *Neosporin or generic equivalent.*

- Keep the following non-child-specific, over-the-counter medication in the first aid kit:  
*(Programs that plan to store over-the-counter medication given by any route other than topical must be approved to administer medication and have all appropriate permissions as required by regulation before administering the medication to a child.)*

Explain here: *Benadryl or generic equivalent.*

- Keep non-child-specific epinephrine auto-injector medication (e.g., EpiPen®, AUVI-Q) in the first aid kit:

*(Programs must be approved to stock epinephrine auto-injectors and have a staff on site who has successfully completed the OCFS approved training as required by regulation before storing and administering the medication to a child).*

Explain here:

- Keep the following types of child-specific medication (e.g., EpiPen®, asthma inhalers) in the first aid kit: *(Programs must be approved to administer medication, with the exception of epinephrine auto-injectors, diphenhydramine in combination with the epinephrine auto-injector, asthma inhalers and nebulizers, and have all appropriate permissions as required by regulation, before storing and administering the medication to a child.)*

Explain here: *Moved to emergency bag if child away from center.*

The program must check frequently to ensure these items have not expired.

If medication is given to a child by a parent or a relative within the third degree of consanguinity of the parents or stepparents of the child during program hours, the dose and time of medication administration must be documented and may be developed in the following manner (check one; at least one MUST be selected):

OCS form: OCS-LDS-7004, Log of Medication Administration

Other: (please attach form developed by the program)

A relative within the third degree of consanguinity of the parents or step-parents of the child including the spouses of the first cousins.

A relative of the child, including the spouses of the great-aunts and great-uncles; the great-aunts and uncles of the child, including the spouses of the aunts and uncles; the great-aunts and great-uncles of the child; the great-grandparents of the child; the great-great-grandparents of the child; the grandparents of the child; the great-great-great-grandparents of the child; the parents of the child; the siblings of the child; the spouses of the first cousins.

A relative of the child, including the spouses of the first cousins.

A person who is a relative, at least 18 years of age (with the exception of the child's parents), who is within the third degree of consanguinity of the parents or step-parents of the child through the program, even though the program is not approved to administer medication.

A person who is a relative, at least 18 years of age (with the exception of the child's parents), who is within the third degree of consanguinity of the parents or step-parents of the child or volunteer of the program, may administer medication to the child - they are related to while the child is attending the program, even though the program is not approved to administer medication.

\*Parent/Relative Administration

Explain here:

If the program will not administer medication (other than over-the-counter topical ointments, lotions and creams, sprays, including sunscreen products and topically applied insect repellent and/or epinephrine auto-injectors), explain how the needs of the child will be met if the child is taking medication that requires inhalers, diphenhydramine in combination with the epinephrine auto-injector, asthma inhalers and auto-injectors, even if the child has never used them before.

|                                     |  |  |  |
|-------------------------------------|--|--|--|
| <input checked="" type="checkbox"/> | The program WILL administer patient-specific epinephrine auto-injectors, inhalers and nebulizers. The program has made the following decision regarding the administration of medication (check all that apply; at least one MUST be selected):

#### Section 8: Program Decision on the Administration of Medication

**Section 9: Programs that WILL Administer Over-the-Counter Topical Ointments, Lotions and Creams, and Sprays, Including Sunscreen Products and Topically Applied Insect Repellant, and/or patient-specific Epinephrine Auto-injectors, Diphenhydramine in Combination with the Epinephrine Auto-injector, Asthma Inhalers and Nebulizers.**

**Over-the-Counter Topical Ointments, Lotions and Creams, and Sprays Including Sunscreen Products and Topically Applied Insect Repellant (TO/S/R)**

The program will have parent permission to apply any TO/S/R.

Any over the counter TO/S/R will be applied in accordance with the package directions for use. If the parent's instructions do not match the package directions, the program will obtain health care provider or authorized prescriber instructions before applying the TO/S/R.

All over the counter TO/S/R will be kept in its original container. All child specific TO/S/R will be labeled with the child's first and last names.

TO/S/R will be kept in a clean area that is inaccessible to children.

Explain where these will be stored: *In specific labeled containers  
in the classroom.*

All leftover or expired TO/S/R will be given back to the child's parent for disposal. TO/S/R not picked up by the parent may be disposed of in a garbage container that is not accessible to children.

All over the counter TO/S/R applied to a child during program hours will be documented and maintained in the following way (**check all that apply; at least one MUST be selected**):

- OCFS form *Log of Medication Administration, OCFS-LDSS-7004*
- On a child-specific log (*please attach form developed by the program*)
- Other:

Explain here:

|                    |    |       |         |   |    |       |         |

| LICENSEE INITIALS: | AM | DATE: 1/21/25 | HEALTH CARE CONSULTANT (HCC) INITIALS (if applicable): R3 | DATE: 1/21/25 |
|--------------------|----|---------------|---|---------------|

The child will be required to wear protective clothing when outdoors + kept in shaded area as possible.

Explain here:

Describe the program's procedure for protecting children in the absence of parental permission to apply TO/S/R, such as sunscreen or insect repellent.

It is the program's obligation to protect the children in care from injury. Part of this obligation includes the application of TO/S/R according to parent permission.

- TO/S/R that may be contaminated will be discarded in a safe manner.
- Gloves will be worn when needed.
- An adequate amount of TO/S/R will be obtained so it is not necessary to get more once the staff has started to apply the TO/S/R (if additional TO/S/R must be dispensed after applying it to a child's skin, hands will be washed before touching the dispenser).
- Care will be taken to remove the TO/S/R from the bottle or tube without touching the dispenser.
- Hands will be washed before and after applying the TO/S/R.

The program will adhere to the following infection control guidelines whenever using non child-specific TO/S/R:

Parents will be made aware that the TO/S/R being applied is not child-specific and may be used by multiple children.

Explain here:

Parents have given consent. These include the following:

Apply over the counter TO/S/R, which parents supply for their child.

The program will (check all that apply):

All observable side effects will be documented. Parents will be notified immediately of any observed side effects, if necessary, emergency medical services will be called.

**Patient-Specific Epinephrine Auto-Injectors, Diphenhydramine in Combination with the Epinephrine Auto-Injector, Asthma Inhalers and Nebulizers.**

Staff NOT authorized to administer medications may administer emergency care through the use of patient-specific epinephrine auto-injector devices, diphenhydramine when prescribed for use in combination with the epinephrine auto-injector, asthma inhalers or nebulizers, when necessary to prevent or treat anaphylaxis or breathing difficulty for an individual child, when the parent and the child's health care provider have indicated such treatment is appropriate.

In addition, the program will obtain the following:

- A written *Individual Health Care Plan* (IHP), for a Child with Special Health Care Needs must be submitted. Form **OCFS-LDSS-7006**, *Individual Health Care Plan for a Child with Special Health Care Needs*, may be used to meet this requirement. (See **Section 2: Children with Special Health Care Needs**.)
- Form **OCFS-6029**, *Individual Allergy and Anaphylaxis Emergency Plan* for children with a known allergy, and the information on the child's **OCFS-LDSS-0792**, *Day Care Enrollment* (Blue Card).
- An order from the child's health care provider to administer the emergency medication including a prescription for the medication. The OCFS *Medication Consent Form - Child Day Care Program*, **OCFS-LDSS-7002**, may be used to meet this requirement.
- Written permission from the parent to administer the emergency medication as prescribed by the child's health care provider. The OCFS *Medication Consent Form - Child Day Care Program*, **OCFS-LDSS-7002**, may be used to meet the requirement.
- Instruction on the use and administration of the emergency medication that has been provided by the child's parent, child's health care professional or a health care consultant.

Additionally:

- Staff who have been instructed on the use of the epinephrine auto-injector, diphenhydramine, asthma medication or nebulizer must be present during all hours the child with the potential emergency condition is in care and must be listed on the child's Individual Health Care Plan.
- The staff administering the epinephrine auto-injector, diphenhydramine, asthma medication or nebulizer must be at least 18-years old, unless the administrator is the parent of the child.
- Staff must immediately contact **911** after administering epinephrine.
- If an inhaler or nebulizer for asthma is administered, staff must call **911** if the child's breathing does not return to normal after its use.
- Storage, documentation of administration of medication and labeling of the epinephrine auto-injector, asthma inhaler and asthma nebulizer must be in compliance with all appropriate regulations.

Explain where these will be stored:

In cabinet in Directors office labeled  
"Emergency Medication"

| License #:                              | 44894                              | Authorized Name (please print): | Ashley McDonough | Date: | 1/27/25 |

The programs' annual policy will be reviewed annually, and parents will be notified of the policy at admission and annually after that.

The health care plan will be made available to the parents at admission and whenever changes are made, and the program's health care plan will be given to parents upon request.

OCFS must review and approve the health care plan as part of the licensing process. OCFS must review and approve any changes or revisions to the health care plan before the program can implement the changes.

It is the programs responsibility to follow the health care plan and all day care regulations.

#### Section 12: Licensee Statement

The program will comply with the provisions of the Americans with Disabilities Act. If any child enrolled in the program now or in the future is identified as having a disability covered under the Americans with Disabilities Act, the program will assess the ability of the program to meet the needs of the child. If the program can meet the needs of the child without making a fundamental alteration to the program and the child will need regular or emergency medical attention, the program will follow the steps required to have the program approved to administer medication.

Health information about any child in the program can be given to the social services district upon request or otherwise allowed by law.

Information about any child in the program is confidential and will not be given to anyone except OCFS, its designees or other persons authorized by law.

#### Section 10: Confidentiality Statement

Sections 10-12 must be completed ONLY if the program plans to administer over the counter topical ointments, lotions and creams, and sprays, including sunscreen products and topically applied insect repellent and/or patient specific epinephrine auto injector, asthma inhalers and nebulizers, and NOT administer specific epinephrine auto injector, asthma inhalers and nebulizers, and NOT administer any other medication.

The individual Health Care Plan, parental consent and health care provider or licensed prescriber consent documenting permission for a school-age child to carry an inhaler or patient-specific epinephrine auto-injector must be maintained on file by the program.

When a program has agreed to administer an inhaler to a child with asthma or other respiratory condition, or a patient-specific epinephrine auto-injector for anaphylaxis, a school-age child may carry and use these devices during day care hours if the program secures written permission of such use of a duly authorized health care provider or licensed prescriber, and written parental consent, and completes an individual Health Care Plan for the child.

#### School-Age Children Exemptions for Carrying and Administering Medication

### **Section 13: For Programs that WILL Administer Medication**

The program will administer prescription and non-prescription medication by all routes covered in the Medication Administration Training (MAT) course (*oral, topical, eye, ear, and inhaled medications, medicated patches, and epinephrine via a patient-specific epinephrine auto-injector device*).

The program will administer medication in accordance with the OCFS child day care regulations. Only a staff person who has completed the appropriate training or has appropriate licensure and is listed as a medication administrator in this health care plan will be permitted to administer medication in the program, with the exception of over-the-counter topical ointments, lotions and creams, and sprays, including sunscreen products and topically applied insect repellent, and/or emergency medications — *patient-specific epinephrine auto-injectors, diphenhydramine when prescribed in combination with the epinephrine auto-injector, asthma inhalers and nebulizers*.

### **Section 14: Authorized Staff to Administer Medication**

***Appendix H (following the instructions in Section 14 must be completed, if the program plans to administer medication).***

Any individual listed in ***Appendix H*** as a medication administrator is approved to administer medication using the following routes: topical, oral, inhaled, eye and ear, medicated patches and using a patient-specific epinephrine auto-injector device.

**If a child in the program requires medication rectally, vaginally, by injection or by another route not listed above, the program will only administer such medication in accordance with the child care regulations.**

Any individual listed in ***Appendix H***, as trained to administer non-child specific, stock epinephrine auto-injector can only dispense this medication if they meet the additional training requirements outlined in ***Appendix J***.

**To be approved to administer medication, other than over-the-counter topical ointments, lotions and creams, and sprays, including sunscreen products and topically applied insect repellent, all individuals listed in the health care plan must be at least 18-years of age and have a valid:**

- Medication Administration Training (MAT) certificate.
  - Cardiopulmonary Resuscitation (CPR) certificate, which covers all ages of children the program is approved to care for as listed on the program's license.
  - First aid certificate that covers all ages of children the program is approved to care for as listed on the program's license.
- OR—**
- Exemption from the training requirements as per regulation.

The individual(s) listed in the health care plan as medication administrator(s) may only administer medication when the medication labels, inserts, instructions, and all related materials are written in the language(s) in which the medication administrator(s) is literate.

All medication administrator(s) will match the "Five Rights" (child, medication, route, dose, and time) in accordance with regulations and best practice standards whenever administering medication.

All medication administrator(s) will match the "Five Rights" (*child, medication, route, dose, and time*) in accordance with regulations and best practice standards whenever administering medication.

***Section 17: Medication Errors.***

The program will document whenever medication is not given as scheduled. The date, time, and reason for this will be documented. Parents will be notified immediately if give medication as scheduled is a medication error, the program will follow all policies and procedures related to medication errors. (See effects, if necessary, emergency medical services will be called.)

All observable side effects will be documented. Parents will be notified immediately of any observed side effects (please attach form developed by the program)

OCFs form Log of Medication Administration, OCFs-LDSS-7004

(check one; at least one MUST be selected):  
The program uses the following form to document the administration of medication during program hours

All medication administered to a child during program hours will be documented.

*Mouthly.*

Explain here:

Medication consent forms for ongoing medication must be renewed as required by regulation. How often will you review written medication permissions and instructions to verify they are current and have not expired?

Medication consent forms NOT received on the OCFs form will be accepted on a health care provider's document on the condition that the required medication-related information is complete. This requirement is met if the OCFs form is accepted on a health care provider's document and instructions to administer medication. The OCFs form will accept permission and instructions to administer medication. The OCFs form may be used to meet this requirement.

Medication Consent Form -Child Day Care Program, OCFs-LDSS-7002 may be used to meet this requirement.

Medication consent form (check all that apply); at least one MUST be selected):  
Explained here: Upon completion/discontinuation of medication all forms

Child's file  
 Medication logbook/Binders  
 Other:

All medication consents and medication logs will be kept in the following location:

**Section 15: Forms and Documentation Related to Medication Administration**

### Verbal Permissions and Instructions

The program's policy regarding the acceptance of verbal permission and instructions when a parent is not able to provide the program with written permission and instructions is as follows (**check one; at least one MUST be selected**):

- The program **WILL NOT** accept verbal permission or instructions. All permission and instructions must be received in writing.
- The program **WILL** accept verbal permission from the parent and verbal instructions from the health care provider only to the extent permitted by OCFS regulation. *(Only those individuals approved in the health care plan to administer medication will accept verbal permission and instructions for all medication except over-the-counter topical ointments, lotions and creams, and sprays, including sunscreen products and topically applied insect repellent.)*

If the program **WILL** accept verbal permissions and verbal instructions, the program will document the verbal permission and instructions received and the administration of the medication. The following form may be used to meet this requirement (**check one; at least one MUST be selected**):

- OCFS form, **OCFS-LDSS-7003, Verbal Medication Consent Form and Log of Administration**
- Other: *(please attach form developed by the program)*

In a food refrigerator in a separate leak-proof container that is inaccessible to children.

In a medication-only refrigerator located:

Medication requiring refrigeration will be stored (check all that apply; at least one MUST be selected):

Explain here: *In Director's office In cabinet next to desk* "Labeled " Medication / Emergency Medication

Medication must be kept in a clean area that is inaccessible to children. Explain where medication will be stored. Note any medications, such as epinephrine auto-injectors or asthma inhalers, that may be stored in a different area.

All medication will be kept in its original labeled container.

(regulation)

Will be stocked at the program (the procedure for stocking this medication must comply with

Will not be stocked at the program

Non-child-specific epinephrine auto-injector medication (check one; at least one MUST be selected):

Will be stocked at the program. (The procedure for stocking this medication must comply with

regulation) In first aid kit

Will not be stocked at the program.

Non-child-specific, over-the-counter medication (check one; at least one MUST be selected):

All child-specific medication must be properly labeled with the child's first and last name and be accompanied by the necessary parent permission and, when applicable, health care provider instructions in accordance with OCS regulations before it will be accepted from the parent.

#### Section 16: Stacking, Handling, Storing and Disposing of Medication

## Controlled Substances

All medications with a pharmacy label identifying the contents as a controlled substance are regulated by the Federal Drug Enforcement Agency. These medications will be: (check all that apply; at least one MUST be selected):

- Stored in a locked area with limited access.
- Counted when receiving a prescription bottle from a parent or guardian.
- Counted each day if more than one person has access to the area where they are stored.
- Counted before being given back to the parent for disposal.
- Other:

Explain here:

Explain where controlled substances will be stored and who will have access to these medications:

Explain here: In locked Bankers bag + then in locked area of medication area located in Director's office. Only MAT Expired Medication trained individuals will have access.

The program will check for expired medication (check one; at least one MUST be selected):

- Weekly
- Monthly
- Other:

Explain here:

## Medication Disposal

All leftover or expired medication will be given back to the child's parent for disposal. Medication not picked up by the parent may be disposed of in a safe manner. Stock medication will be disposed of in a safe manner. Stock epinephrine auto-injector devices will be disposed of as outlined in **Appendix J**.

|                                     |  |                         |            | Physician assistant, nurse practitioner or registered nurse.      |            |  |  |
|                                     |  |                         |            |   |            |  |  |
|                                     |  |                         |            |   |            |  |  |

Section 18 must be completed by the Health Care Consultant (HCC) if the program will administer any medication and/or for programs offering care to infants and toddlers or moderately ill children. In addition, the program will notify these additional people (e.g., the program's Health Care Consultant), if no additional notifications, put NA in this section.

- Will complete the form, OCF-S-LDS-7005, Medication Report or equivalent, to report all medication errors that occur in the program. If more than one child is involved in the error, the program will complete the form, OCF-S-LDS-7005, Medication Report or equivalent, for each child involved.
- Will notify OCF-S as soon as possible, but no later than 24-hours of any error occurs.
- May encourage the child's parent to contact the child's health care provider when the error occurs.

When any medication error occurs, the program:

The parent must be notified immediately and OCF-S must be notified within 24-hours of any medication administration errors. Notification to OCF-S must be reported on form OCF-S-LDS-7005, Medication Error Report, provided by OCFS or on an approved equivalent. The program will maintain confidentiality of all children involved.

**Section 17: Medication Errors: COMPLETE THIS SECTION IF THE PROGRAM WILL ADMINISTER ANY MEDICATION**

In addition, as the program's Health Care Consultant, I will:

- Verify that all staff authorized to administer medication have the necessary professional credentials or have successfully completed all required trainings as per the NYS OCFS day care regulations (*MAT, age-appropriate CPR and first aid training, emergency medication, Epinephrine Auto-Injector*).

Other:

Explain here:

### **Health Care Consultant Review of Health Care Plan**

For programs offering administration of medication, the program's Health Care Consultant (HCC) must visit the program at least once a year. For programs offering care to infants and toddlers or moderately ill children that are not otherwise administering medication, the program's HCC must visit the program at least once every two years. This visit will include:

- A review of the health care policies and procedures.
- A review of documentation and practice.
- An evaluation of the program's ongoing compliance with the Health Care Plan (HCP) and policies.

| HCP review date | HCC Signature          |

### **Section 19: Confidentiality Statement**

Information about any child in the program is confidential and will not be given to anyone except OCFS, its designees or other persons authorized by law.

Health information about any child in the program will be given to the social services district upon request if the child receives a day care subsidy or if the child has been named in a report of suspected child abuse or maltreatment or as otherwise allowed by law.

| Day Care Program's Name (please print): | DaedreBugs! Childrens | Address: | East Amherst | License #: | 448910 | Authorized Signature: | <i>Christy McAvoy</i> | Date: | 1/27/25 |
|---|-----------------------|----------|--------------|------------|--------|-----------------------|-----------------------|-------|---------|

Once the Health Care Consultant and OCS approve the health care plan, the program will notify parents of the health care plan.

The HCC and OCS must review and approve any changes or revisions to the health care plan before the program can implement the changes, including additions or changes to individuals listed in the health care plan as medical staff(s). The program will notify the HCC and OCS to changes in medication administration credentials and the termination of medication administrator(s) at the health care plan as medical staff(s). The program will notify the HCC and OCS to changes in medication emergency medications and stock equipment auto-injectors.

If the HCC terminates their relationship with the program, the program must notify OCS and will have 60 days to obtain a new HCC. The new HCC must also review and approve the Health Care Plan. If the program does not obtain a new HCC, the new HCC will notify OCS of any change in the HCC of record. The process. The program must document in *Appendix I* and notify OCS of any change in the licensing process. The Health Care Consultant and OCS must review and approve the health care plan as part of the licensing application to administer medication.

The Health Care Consultant and OCS must review and approve the health care plan that the program no longer has the ability to administer medication, before the next day the program operates that the program no longer has the ability to administer medication, or otherwise loses the ability to administer medication, must advise the parent of every child in care revoked, A program authorized to administer medication, which has had the authorization to administer medication before the next day the program operates that the program no longer has the ability to administer medication.

The program will notify OCS immediately if the health care plan is revoked for any reason by the Health Care Consultant.

The program will notify the HCC and OCS of all new staff approved to administer medication and have the health care consultant review and approve their certificates before the individual is allowed to administer medication to any child in day care.

The program will notify the HCC and OCS if the health care plan is revoked for any reason by the Health Care Consultant or registered nurse.

As provided for in Section 18, the program will have a Health Care Consultant (HCC) of record who will review and approve the policies and procedures described in this health care plan as a physician, physician assistant, nurse practitioner or registered nurse.

The program's snapshotaxis policy will be reviewed annually, and parents will be notified of it at admission and annually after that.

The program's health care plan will be given to parents at admission and whenever changes are made, and the health care plan will be made available to parents upon request.

It is the program's responsibility to follow the health care plan and all day care regulations.

## Section 21: Licensee Statement

The program will comply with the provisions of the Americans with Disabilities Act. If any child enrolled in the program now or in the future is identified as having a disability covered under the Americans with Disabilities Act, the program will assess the ability of the program to meet the needs of the child without making a fundamental alteration to the program and the child will need regular or emergency medication a will follow the steps required to have the program approved to administer medication.

## Section 20: Americans with Disabilities Act (ADA) Statement for Programs

## Section 22: Training

All child day care personnel must be trained in the program's Health Care Plan and policies including a training program for child day care personnel in screening and identification of children with allergies, how to prevent, recognize and respond to food and other allergic reactions and anaphylaxis, strategies to reduce risk of exposure to allergic triggers, how the program will handle anaphylaxis episodes.

Staff/volunteers will be trained in the following method(s) (**check all that apply; at least one MUST be selected**):

- Orientation upon hire
- Staff meetings
- Scheduled professional development.

Anaphylaxis Training Video on ECETP site.

Communication plan for intake and dissemination of information among staff and volunteers regarding children with food or other allergies (including risk reduction) will include (**check all that apply; at least one MUST be selected**):

- Posting in program
- Staff meetings
- Other

Explain here: List of all children in center with allergies will be posted in each classroom + in kitchen area

The program will routinely monitor to ensure new staff/volunteers are receiving the training outlined above in the following manner (**check all that apply; at least one MUST be selected**):

- File review
- Staff meetings
- Other

Explain here: Documented in Training Tracker  
List of all trained individuals Kept in Parent Lounge Binder.

## Appendix A

- A daily health check occurs when the child arrives at the program and whenever a change in the child's behavior and/or appearance is noted. The child must be awake so an accurate assessment can be done. Check the following while at the child's level so you can interact with the child when talking with the parent.
1. Child's behavior: Is it typical or atypical for time of day and circumstances?
2. Child's appearance:
- Skin: pale, flushed, rash (Feel the child's skin by touching affectively.)
  - Eyes, nose, and mouth: note color; are they dry or is there discharge? Is child rubbing eye, nose, or mouth?
  - Hair (In a little outbreak, look for nits within  $\frac{1}{4}$ " of the scalp.)
  - Breathing: normal or different; cough
3. Check with the parent:
- How did the child seem to feel or act at home?
  - Sleeping normally?
  - Eating/drinking normally? When was the last time child ate or drank?
  - Bowels and urine normal? When was the last time child used toilet or was changed?
  - Has the child received any medication?
  - Any evidence of illness or injury since the child was last participating in child care?
  - Any indications of suspected child abuse or maltreatment?
4. Document that the daily health check has been completed. **OCS-LDSS-443, Child Care Attendance Sheet** may be used to meet this requirement.
- Any signs of illness, communicable disease, injury and/or suspected abuse and maltreatment found will be documented and kept on file for each child in accordance with **Section 3: Daily Health Checks**.

## Appendix B: Hand Washing

Staff and volunteers must thoroughly wash their hands with soap and running water:

- At the beginning of each day.
- Before and after the administration of medications.
- When they are dirty.
- After toileting or assisting children with toileting.
- After changing a diaper.
- Before and after food handling or eating.
- After handling pets or other animals.
- After contact with any bodily secretion or fluid.
- After coming in from outdoors.

Staff and volunteers must ensure that children thoroughly wash their hands or assist children with thoroughly washing their hands with soap and running water:

- When they are dirty.
- After toileting.
- Before and after food handling or eating.
- After handling pets or other animals.
- After contact with any bodily secretion or fluid.
- After coming in from outdoors.

All staff, volunteers and children will wash their hands using the following steps:

- 1) Moisten hands with water and apply liquid soap.
- 2) Rub hands with soap and water for at least 30 seconds – remember to include between fingers, under and around fingernails, backs of hands, and scrub any jewelry.
- 3) Rinse hands well under running water with fingers down so water flows from wrist to fingertips.
- 4) Leave the water running.
- 5) Dry hands with a disposable paper towel or approved drying device.
- 6) Use a towel to turn off the faucet and, if inside a toilet room with a closed door, use the towel to open the door.
- 7) Discard the towel in an appropriate receptacle.
- 8) Apply hand lotion, if needed.

When soap and running water is not available and hands are visibly soiled, individual wipes may be used in combination with hand sanitizer. The use of hand sanitizers on children under the age of 2-years is prohibited.

Appendix C

- Diapering will be done only in the selected diapering area. Food handling is not permitted in diapering areas.
- Surfaces in diapering areas will be kept clean, waterproof, and free of cracks, tears, and crevices. All containers of skin creams and cleaning items are labeled appropriately and stored off the diapering surface and out of reach of children.
- Diapers will be changed using the following steps:

Surfaces in diapering areas will be kept clean, waterproof, and free of cracks, tears, and crevices. All containers of skin creams and cleaning items are labeled appropriately and stored off the diapering surface and out of reach of children.

Diapering will be done only in the selected diapering area. Food handling is not permitted in diapering areas.

## **Diapering**

#### Appendix C:

## Appendix D:

### Safety Precautions Related to Blood

All staff will follow standard precautions when handling blood or blood-contaminated body fluids.

These are:

- a) Disposable gloves must be immediately available and worn whenever there is a possibility for contact with blood or blood-contaminated body fluids.
- b) Staff are to be careful not to get any of the blood or blood-contaminated body fluids in their eyes, nose, mouth, or any open sores.
- c) Clean and disinfect any surfaces, such as countertops and floors, onto which blood has been spilled.
- d) Discard blood-contaminated material and gloves in a plastic bag that has been securely sealed. Clothes contaminated with blood must be returned to the parent at the end of the day.
- e) Wash hands using the proper hand washing procedures.

**In an emergency, a child's well-being takes priority. A bleeding child will not be denied care even if gloves are not immediately available.**

## Appendix E

- Equipment, toys, and objects used or touched by children will be cleaned and sanitized or disinfected, as follows:
1. Equipment that is frequently used or touched by children daily must be cleaned and then sanitized or disinfected, using an EPA-registered product, when soiled and at least once weekly.
  2. Carpets contaminated with blood or bodily fluids must be spot cleaned.
  3. Diapering surfaces must be disinfected after each use, with an EPA-registered product following labels direction for diapering surfaces (including cutting boards).
  4. Countertops, tables, and food preparation surfaces (including cutting boards) must be cleaned and sanitized before and after food preparation and eating.
  5. Potty chairs must be emptied and rinsed after each use and cleaned and then sanitized or disinfected daily with a disinfectant with an EPA-registered product following label directions for that purpose. If more than one child in the program uses the potty chair, the chair must be emptied, rinsed, cleaned, and sanitized or disinfected with an EPA-registered product after each use. Potty chairs must not be washed out in a hand washing sink, unless that sink is cleaned, then disinfected after such use.
  6. Toilet facilities must always be kept clean, and must be supplied with toilet paper, soap and towels accessible to the children.
  7. All rooms, equipment, surfaces and furnishings accessible to children must be cleaned and then sanitized or disinfected, using an EPA-registered product following label directions for that purpose, as needed to protect the health of children.
  8. Thermometers and toys mouthed by children must be washed and disinfected using an EPA-registered product following label directions for that purpose before use by another child.

### Sanitizing and Disinfecting Solutions

Unsanitized chlorine bleach is the most commonly used sanitizing and disinfecting agent because it is affordable and easy to get. The State Sanitary Code measures sanitizing or disinfecting solution in "parts per million," but programs can make the correct strength sanitizing or disinfecting solution (*without* having to buy special equipment) by reading the label on the bleach container and using common household measurements.

Sodium hypochlorite is the active ingredient in chlorine bleach. Different brands of bleach may have different amounts of this ingredient; the measurements shown in this appendix are for bleach containing 6 percent to 8.25 percent sodium hypochlorite. The only way to know how much sodium hypochlorite is in the bleach is by reading the label. Always read the bleach bottle to determine its concentration before buying it. If the concentration is not listed, you should not buy that product.

Using bleach that contains 6 percent to 8.25 percent sodium hypochlorite, programs need to make two standard recommended bleach solutions for spraying nonporous or hard surfaces and a separate solution for soaking toys that have been mouthed by children. Each spray bottle should be labeled with its respective mixture and purpose. Keep it out of children's reach. The measurements for each type of sanitizing or disinfecting solution are specified on the next page.

### Use Common Household Measurements

Sodium hypochlorite is the active ingredient in chlorine bleach. Different brands of bleach may have different amounts of this ingredient; the measurements shown in this appendix are for bleach containing 6 percent to 8.25 percent sodium hypochlorite. The only way to know how much sodium hypochlorite is in the bleach is by reading the label. Always read the bleach bottle to determine its concentration before buying it. If the concentration is not listed, you should not buy that product.

### Read the Label

Unsanitized chlorine bleach is the most commonly used sanitizing and disinfecting agent because it is affordable and easy to get. The State Sanitary Code measures sanitizing or disinfecting solution in "parts per million," but programs can make the correct strength sanitizing or disinfecting solution (*without* having to buy special equipment) by reading the label on the bleach container and using common household measurements.

### Sanitizing and Disinfecting Solutions

### Cleaning, Sanitizing and Disinfecting

#### Appendix E:

### **SPRAY BLEACH SOLUTION #1 (for food contact surfaces)**

Staff will use the following procedures for cleaning and sanitizing nonporous hard surfaces such as tables, countertops, and highchair trays:

1. Wash the surface with soap and water.
2. Rinse until clear.
3. Spray the surface with a solution of **½ teaspoon of bleach to 1 quart of water** until it glistens.
4. Let sit for two minutes.
5. Wipe with a paper towel or let air-dry.

### **SPRAY BLEACH SOLUTION #2 (for diapering surfaces or surfaces that have been contaminated by blood or bodily fluids)**

Staff will use the following procedures for cleaning and disinfecting diapering surfaces or surfaces that have been contaminated by blood or bodily fluids:

1. Put on gloves.
2. Wash the surface with soap and water.
3. Rinse in running water until the water runs clear.
4. Spray the surface with a solution of **1 tablespoon of bleach to 1 quart of water** until it glistens.
5. Let sit for two minutes.
6. Wipe with a paper towel or let air-dry.
7. Dispose of contaminated cleaning supplies in a plastic bag and secure.
8. Remove gloves and dispose of them in a plastic-lined receptacle.
9. Wash hands thoroughly with soap under running water.

### **SOAKING BLEACH SOLUTION (for sanitizing toys that have been mouthed)**

Staff will use the following procedure to clean and sanitize toys that have been mouthed by children:

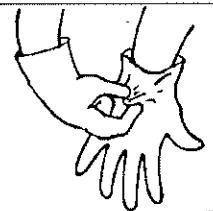

1. Wash the toys in warm soapy water, using a scrub brush to clean crevices and hard-to-reach places.
2. Rinse in running water until water runs clear.
3. Place toys in soaking solution of **1 teaspoon of bleach to 1 gallon of water**.
4. Soak for five minutes.
5. Rinse with cool water.
6. Let toys air-dry.

When sanitizing or disinfecting equipment, toys and solid surfaces, the program will use (check all that apply; at least one MUST be selected):

- EPA-registered product approved for sanitizing and disinfecting, following manufacturer instructions for mixing and application.
- Bleach solution made fresh each day.
  - o Spray solution #1: **½ teaspoon of bleach to 1 quart of water**.
  - o Spray solution #2: **1 tablespoon of bleach to 1 quart of water**.
  - o Soaking solution: **1 teaspoon of bleach to 1 gallon of water**.

## Appendix F

Glove use does not replace hand washing. Staff must always wash their hands after removing and disposing of medical gloves.

|   |  |
|---|--|
|   | 5. Wash hands.   |
|    |  |
|   | 4. Drop the dirty gloves into a plastic-lined trash receptacle.  |
|   | 3. Use the non-gloved hand to strip the other glove off. Insert a finger underneath the glove at the wrist and push the glove up and over the glove in the palm. The inside surface of your glove and your ungloved hand are considered clean. Be careful to touch clean surfaces to clean surfaces only. Do not touch the outside of the glove with your ungloved hand. |
|  | 2. Ball up the first glove in the palm of the other gloved hand.   |
|  | 1. Remove the first glove by pulling at the palm and stripping the glove off. The entire outside surface of the glove is considered dirty. Have dirty surfaces touch dirty surfaces only.  |

### REMOVAL and DISPOSAL

|  |  |
|--|--|
|  | 2. Put on a clean pair of gloves. Do not reuse gloves. |
|  | 1. Wash hands.   |

### DONNING Gloving Appendix F:

## Appendix G:

### Medical Emergency

- Remain calm. Reassure the child (victim) and the other children at the scene.
- If the area is unsafe, move to a safe location.
- Follow first aid and/or CPR protocols.
- Call for emergency medical services 911. Give all the important information slowly and clearly. To make sure that you have given all the necessary information, wait for the other party to hang up first. If an accidental poisoning is suspected, contact the **National Poison Control Hotline** at **1-800-222-1222** for help.
- Follow instructions given by the emergency operator.
- Send emergency contact information and permission to obtain emergency care when the child is transported for emergency care.
- Notify parent of the emergency as soon as possible. If the parent can't be reached, notify the child's emergency contact person.
- After the needs of the child and all others in care have been met, immediately notify OCFS if the emergency involved death, serious incident, serious injury, serious condition, communicable illness (*as identified on the New York State Department of Health list*) [DOH-389] *accessible at* [https://health.ny.gov/forms/instructions/doh-389\\_instructions.pdf](https://health.ny.gov/forms/instructions/doh-389_instructions.pdf) or transportation to a hospital, of a child that occurred while the child was in care at the program or was being transported by a caregiver.

## Appendix H

A copy of this form can be sent separately to OCFs if the program's health care plan has already been approved and the only change to the plan is the addition or removal of a medical consultant or an update to information for a current medical consultant. With any modification to the plan, the only change to the plan is the addition or removal of a medical consultant or removal of a health care consultant and OCFs must be notified.

## Appendix H

CCFS Number: 44896

## Appendix I: Revisions

Use this section to record the date and page number(s) of any revisions made to the original health care plan. When a revision (*change, addition, or deletion*) is made to the original health care plan, record the date the change was made and then write the page numbers of any pages affected by the change and submit to OCFS.

Appendix J: Auto-injector device Adminstration of Non-Patient-Specific Epinephrine

## Appendix J:

- The program will designate one or more employees(s) or caregiver(s) who have completed the required training to be responsible for the storage, maintenance, control, and general oversight of the non-patient-specific epinephrine auto-injector devices acquired by the program. The designated employee(s) or caregiver(s) may not use a non-patient-specific epinephrine auto-injector device on behalf of the program until he or she has successfully completed a training course in the use of epinephrine auto-injector devices conducted by a nationally recognized organization experienced in training laypersons in emergency instances or by an entity, or individual approved by DOH, or is directed in a specific instance to use an epinephrine auto-injector device by a health care practitioner who is authorized to administer drugs and who is acting within the scope of his or her practice. The required training must include: (i) how to recognize signs and symptoms of severe allergic reactions, including anaphylaxis; (ii) recommended dosage for adults and children; (iii) standards and procedures for the storage and administration of epinephrine auto-injector devices; and (iv) procedures for the recognition of epinephrine auto-injector devices and epinephrine auto-injector devices that each designated employee or caregiver has successfully completed the required training will be kept on site and available to OCFs or its representatives.
  - Each designee or caregiver will be recorded on **Appendix H** and updated as needed.
  - The program will obtain a non-patient-specific prescription for an epinephrine auto-injector device from a health care practitioner or pharmacist who is authorized to prescribe an epinephrine auto-injector device.
  - The program will obtain the following non-patient specific epinephrine auto-injector devices (check all that apply):
    - Infants and Toddlers (generally up to age 3) = 0.1mg dose (16.5lbs to 33lbs)
    - Child (generally ages 3 yrs - 8yrs) = 0.15mg dose (33lbs to 66lbs)
    - Older Child/Adult (generally persons over 8 yrs of age) = 0.30mg dose (over 66lbs)
  - For children weighing less than 16.5 lbs., the program will **NOT** administer epinephrine auto-injector and will call 911.
  - The program will check the expiration dates of the non-patient specific epinephrine auto-injector devices and dispose of units before each expires. How often will the program check the expiration date of these units?
  - For children weighing less than 16.5 lbs., the program will **NOT** administer epinephrine auto-injector and will call 911.
  - The program will check the expiration dates of units before each expires. How often will the program check the expiration date of these units?
  - Every three months
  - Every six months
  - Other:

The program agrees to the following:

- The program will purchase, acquire, possess, and use non-patient-specific epinephrine auto-injector devices for emergency treatment of a person experiencing to experience anaphylactic symptoms.

- Specify name and title of staff responsible for inspection of units:
- The program will dispose of expired epinephrine auto-injectors at:
  - A licensed pharmacy, health care facility or a health care practitioner's office.
  - Other:
- The program understands that it must store the epinephrine auto-injector device in accordance with all the following:
  - In its protective plastic carrying tube in which it was supplied (original container)
  - In a place that is easily accessed in an emergency
  - In a place inaccessible to children
  - At room temperature between 68° and 77° degrees
  - Out of direct sunlight
  - In a clean area
  - Store separately from child-specific medication
- Specify location where devices will be kept:
- Stock medication labels must have the following information on the label or in the package insert:
  - Name of the medication
  - Reasons for use
  - Directions for use, including route of administration
  - Dosage instructions
  - Possible side effects and/or adverse reactions, warnings, or conditions under which it is inadvisable to administer the medication, and expiration date
- The program will call 911 immediately and request an ambulance after the designated employee or caregiver administers the epinephrine auto-injector device.
- A *Log of Medication Administration, OCFS-LDSS-7004* will be completed after the administration of the epinephrine auto-injector device to any day care child.
- If an epinephrine auto-injector device is administered to a child experiencing anaphylaxis, the program will report the incident immediately to the parent of the child and OCFS (Regional or Borough office). The following information should be reported:
  - Name of the epinephrine auto-injector device
  - Location of the incident
  - Date and time epinephrine auto-injector device was administered
  - Name, age, and gender of the child (to OCFS only)
  - Number and dose of the epinephrine auto-injector administered
  - Name of ambulance service transporting child
  - Name of the hospital to which child was transported

## Appendix K

| Name and Date of Training Program | Name of Trained staff member |
|-----------------------------------|------------------------------|
|                                   |                              |
|                                   |                              |
|                                   |                              |
|                                   |                              |
|                                   |                              |

- The program must designate at least one person on staff through this appendix before stocking opioid antagonist nasal spray.
- This waiver is necessary for the program to obtain, stock, and administer over non-patient specific opioid antagonist nasal spray, without approval of a health care provider and/or non-patient and/or non-patient-specific opioid antagonist nasal spray, to a person the administrator reasonably believes to be experiencing an opioid overdose.
- By submitting this waiver, the program demonstrates the intent to obtain, stock, and administer over non-patient and/or non-patient-specific opioid antagonist nasal spray, without approval of a health care consultant, to a person the administrator reasonably believes to be experiencing an opioid overdose.
- The designated staff must maintain verification that each designated employee has successfully completed the required training. This documentation must be kept on-site and available to OCFs or its representatives.
- The program will follow all OCFs regulations for stocking the medication and will immediately notify the parent and OCFs upon administration.
- The program must call 911 immediately and request an ambulance when the opioid antagonist is administered. Emergency personnel must be advised that an opioid antagonist has been used.
- Additionally, if opioid antagonist nasal spray is administered to a child experiencing symptoms of an opioid overdose, the program will immediately report the administration of the medication to the parent of the child and OCFs (Regional or Borough office). The following information must be reported:
  - Date and time opioid antagonist were administered
  - Name, age, and gender of the child (to OCFs only)
  - Name of ambulance service transporting person
  - Name of the hospital to which person was transported
  - A Log of Medication Administration, OCF-LDSS-7004 must be completed after the administration of the medication.

## Program Requirements

- The program is requesting a waiver of the following regulations to obtain, stock, and administer over non-patient specific opioid antagonist nasal spray, as permitted pursuant to New York Public Health Law Section 3309.
- Day Care Center: 418-1.1(c)(1), (d)(1), (f)(1)(i), (f)(7), (g)(7), and (c)(2)(vii)(c)
  - Small Day Care Center: 418-2.1(c)(1), (d)(1), (f)(1)(i), (f)(7), (g)(7), and (c)(2)(viii)(c)
- The counter and/or non-patient-specific opioid antagonist nasal spray, as permitted pursuant to New York Public Health Law Section 3309, is requested by the following regulations to obtain, stock, and administer over non-patient and/or non-patient-specific opioid antagonist nasal spray, as permitted pursuant to New York Public Health Law Section 3309.

## ADMINISTRATION OF OPIOID ANTAGONIST NASAL SPRAY

### Appendix K:

The program is attesting that the designated staff has successfully completed the training listed above by signing and submitting this appendix.
